Problem Statement

Problem statement:

Many grocery stores exist, but many people have trouble accessing these stores.

Details:

Areas where people do not have proper access to food are called food deserts, food swamps and food insecurity. This is usually found in rural areas or areas where there is lack of public transportation to serve an entire community.

Affinity diagram

Create a public transportation system that transports people to grocery stores

Danell Evans14

Make government allot more money towards food

Danell Evans14

Do more research as to how many people do not have access to food

Danell Evans14

Rural areas have smaller populations

Danell Evans14

Rural areas have a smaller population

Danell Evans14

Create a meals on wheels for produce and other nutrient rich foods

Danell Evans14

Make government allot more food stamps to more people

Danell Evans14

Study how many elderly people are effected by the lack of accessibility to food

Danell Evans14

It is not as common in urban areas as it is in rural areas

Danell Evans14

Most of the U.S. population have cars

Danell Evans14

Have 1-2 food banks at the center of rural areas where it is accessible for everyone

Danell Evans14

Make taxes higher in areas where food is accessible to give back more money to those in food restricted areas

Danell Evans14

Study the demographics of people effected by lack of food

Danell Evans14

Convenient stores are more accessible in food deserts

Danell Evans14

Most of the population eat unsustainable and un healthy foods

Danell Evans14

Create vegetable and fruit gardens within town centers

Danell Evans14

Create government regulated land that distributes grass grown items to

Danell Evans14

Study how brain function is effected based on lack of food

Danell Evans14

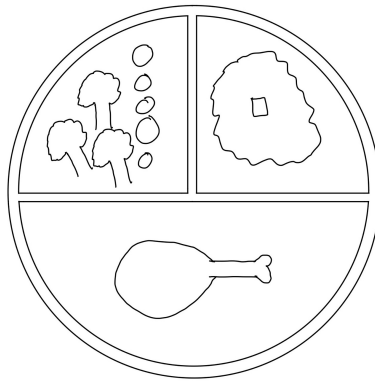

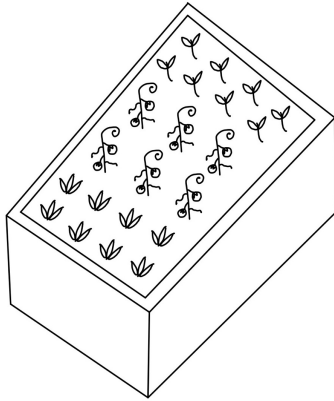

Study the effect of food accessibility and health

Danell Evans14

Study how many children go home hungry for the weekends
